

# DOMINICAN UNIVERSITY

# CAREER & PROFESSIONAL SUCCESS EMPLOYER RESOURCES

Career & Professional Success at Dominican University provides an extensive range of services for potential employers. Our goal is to facilitate your efforts during the pandemic in finding the most qualified candidates for employment and internship opportunities.

## Thursday Live Talk

Be a guest and speak at one of our live sessions. Thursday Live Talks provide a virtual space to reach a large group of students and present available opportunities from your company or organization. Students benefit from the insights of an employer as they ask questions about your company or organization and the opportunities available. As a recruiter – you will benefit from an informed, interested candidate pool.

## Class Presentations

Virtual or in-person class presentations are a great way to reach talented applicants for full-time employment and internships. Appointments between representatives of your organization and our students or alumni can be arranged according to your specifications. Career & Professional Success can publicize your virtual visit and the positions for which you will be presenting.

## Internships

The Dominican University Internship Program serves both employers and students. Interns will bring new energy and a fresh perspective to the sponsoring organization.

Internships at Dominican University are flexible – designed to meet your needs. Let us know about your organization's employment needs (full- or part-time, internships) and we can advertise them to Dominican students. Some earn academic credit, while others intern for the practical experience only. Internships may be paid or unpaid, although compensated internships attract more applicants. Career & Professional Success works to match your needs to that of our students.

## Employment Announcements & Tabling

Dominican University publishes employment and internship opportunities online via Handshake for student and alumni review. Employers are encouraged to create their own Handshake account to post current and future opportunities. If desired, employers also have the option of tabling on campus to meet students and promote opportunities available.
